About me

Hello, everyone I'm Arrico Handyanto. I am interested in Web and Mobile Development. I can do a bit of Back End Development, but dominant and prefer more on Front End Development. During college, I learned some knowledge of HTML, CSS, PHP, SQL, and Java. Currently, I managed to learn another new knowledge like Javascript, NodeJS, ReactJS (CRA), NextJS, even Typescript.
And I'm still waiting to get more!

Work Experience

2021 - 2021

Back End Developer at Refactory

This Internship as Back End Developer is cooperation's result between Informatics Engineering Sebelas Maret University and Refactory Yogyakarta. During this internship, I built a simple Rest API which was developed for a private e-commerce project, Climbee (Klambi: in Javanese it means clothes). This Rest API has several endpoints, namely registration & login using the JWT Token, users, and profile. It was during this internship that I also learned to use NodeJS, Express, PostgreSQL for the first time.
You can check out the project's github repository at https://github.com/arricodyanto/climbee-api

2021 - 2022

Web Administrator at Sebelas Maret University

Assigned as web administrator of the campus' website which updates news content from the campus, performs maintenance and backups of the website. In addition to serving as IT Support for existing IT equipment in related offices. This is a student internship program provided by the campus.
At that time I worked on several projects, ie:
- A Company Profile from Eleven March Project, (https://s.id/1FiTi)
- Migration/Update PPID UNS Website WordPress Theme, (http://ppid.uns.ac.id/)
- Service and News Management Information System (SINATA), (still under development: http://sinata.vercel.app/)

Education

2016 - 2019

SMK Negeri 2 Surabaya - High School Diploma

Computer and Network Engineering

2019 - Present

Universitas Sebelas Maret Surakarta - Associate's Degree

Informatics Engineering
